🔗 Portfolio Website

Profile

Software Developer with 3+ years of professional experience building workflow-driven, enterprise-grade web applications. Strong expertise in PHP (Yii2), MySQL, MVC architecture, and complex relational database design, alongside modern frontend development using React, TypeScript, and Tailwind CSS.

Employment History

01/2025 – Present
, Johannesburg, South
Africa

Software Developer — Remote

Zilo Personalization

- Designed and developed enterprise financial reporting systems using Yii2 and MySQL.
- Built financial reporting modules including Cash Flow Statements, Statements of Financial Position, Comprehensive Income Reports, and Financial Ratio Analytics.
- Designed complex multi-table relational schemas with hierarchical mappings across financial entities.
- Implemented CSV and Excel import tools with data validation, duplicate detection and automated data linking across tables.
- Developed REST APIs and backend services using Yii2 ActiveRecord.
- Optimized database queries and improved system performance.
- Designed and built a complete ticketing system for customers and internal staff.
- Features include customer and internal ticket creation, automatic ticket assignment, task and sub-task creation within tickets, status workflows with priority management, Kanban boards for visual ticket tracking, commenting with internal notes and activity logs, and image and file uploads.
- Implemented role-based permissions for customers, employees, and administrators.
- Improved transparency, accountability, and workflow efficiency.
- Installed and configured Frappe & ERPNext on Ubuntu for CRM and ERP customization.
- Participated in architecture discussions, code reviews, and UI/UX improvements.

01/2022 – 09/2024
Johannesburg, South
Africa

Freelance Software Developer

Freelancer

- Designed, developed, and maintained enterprise-grade web applications using PHP, React, Visual Basic, and MySQL
- Built and integrated RESTful APIs for authentication, dashboards, and real-time data processing
- Developed and maintained transaction and product management systems, including automated pricing, discounts, VAT calculations, and receipt generation
- Designed optimized relational database schemas and improved system performance through efficient queries
- Managed the full software development lifecycle, delivering responsive, secure, and maintainable solutions

Education

01/2022 – 12/2024
Bryanston, South Africa

Bachelor of Science (BSc) in Information Technology

Richfield Graduate Institute of Technology, South Africa

Skills

Frontend Development

- React.js, TypeScript, JavaScript
- React Native
- Tailwind CSS, CSS, HTML
- Responsive & Mobile-First Design
- State Management (Zustand)

Databases & Tools

- MySQL, phpMyAdmin, MySQL Workbench
- Git & GitHub
- Visual Studio Code, Android Studio
- Ubuntu / Linux Environments
- Frappe & ERPNext (installation & customization)

Backend & Architecture

- PHP (Yii2 Framework)
- MVC Architecture
- MySQL
- RESTful API Development
- Authentication & Role-Based Access Control

Soft Skills

- Strong problem-solving and analytical thinking
- Ability to work independently on complex features
- Clear communication with technical and non-technical stakeholders
- Agile teamwork and code review collaboration
- Fast learner with strong adaptability

Projects:

Portfolio [↗](#)

Personal portfolio showcasing React projects, UI components, and web application designs.

React Quiz [↗](#)

Developed a dynamic quiz platform featuring state management and animations.

Food-Ecommerce [↗](#)

Built a fully responsive e-commerce site using React.js and Tailwind CSS.
